Gentlemen:

Among the most stupid and treasonable actions of the USA has been the unremitting attack on Microsoft, the single most civilized and high intellectual contribution to mankind in human history. These anticapitalistic actions stem from the New Democrats, who are the Old Bolsheviks in disguise. Their KGB leadership is Hillary and her scoundrel husband William Jefferson Blythe Clinton. Exceeded only in its virulence against our republic by propagation of the myth that the cold war is over, the attack on Gates has greatly harmed our economy, our philosophy of individualism, and our wealth, the storehouse of power on earth.

We must attack first the terrorism at home before we expend our resources grinding into sand the Afghan rocks and rag-heads.

Once we regain our sanity we can build fusion energy, convert to the metric system, drill on the north slope, and hang traitors.

Truly yours,  
E.S.Weissburg
